

# *Free Wireless Internet*

Lanier Canoe 2003 and **DTNet Technologies** are excited to offer 3 wireless Hot Spots for broadband wireless Internet access to all event athletes and attendees.

Wireless access is being provided in the following areas:

- The Athlete's Village at the Georgia Mountain Center (lobby area)
- Around the grandstands at the venue's competition area
- In and around the boathouse at the venue

These wireless hot spots are an 802.11b type network, so your computer will need to support this standard.

## Instructions:

To access the Internet via the wireless network, you'll need to set your computers SSID to 'canoe2003'. This can be done by modifying your wireless network cards settings. Once done, your computer will receive the correct information from the hot spots to allow Internet access.

*Please remember that this wireless network is open to public use, and therefore is not secure. It should not be used for confidential information.*

More information on services provided by **DTNet Technologies** can be found on their website at [www.dtnet.com](http://www.dtnet.com).

**Wireless Networks • VPN • Video Conferencing • Document Imaging**
